100% MADE IN USA

ENGINEERED IN DETROIT. MANUFACTURED IN OHIO.

Manufactured in Defiance, Ohio, we have gone to great lengths in R&D, engineering, and manufacturing to make life easier for our customers. Driven by a passion for perfection and doing the right thing, we are proud to design, engineer, and manufacture our products from recycled materials right here in the U.S.A. We're even prouder to treat our workers well and help improve the everyday lives of our customers.

WORK SMARTER

We took DIY plywood drawers and turned the idea into an engineered, rugged and affordable solution for fleets, commercial applications, tradesmen, public safety responders, military applications and more... and we did it right here in the USA.

ORGANIZED STORAGE

SAVE TIME. SAVE MONEY.

Roll up to the jobsite ready to go with the tools and materials for the day organized and easily accessible. With DECKED's customizable storage and line of drawer components, you'll end the 'junk show' in the bed of your truck or van cargo area and get organized for the job.

ERGONOMIC

ONE OF THE EASIEST WAYS TO REDUCE INJURIES AND INCREASE FLEET SAFETY.

DECKED optimizes worker safety by making accessing items like tools, hardware, gear and toolboxes safer, rolling them out to the worker in the “power zone.” With DECKED, your worker will never need to crawl into the bed of the vehicle again. The leading cause of workplace injury is over-exertion from lifting, pulling, holding and carrying in awkward positions, including in and around work vehicles. Jobs that involve working from the bed of a pickup or cargo van expose the worker to these very hazardous movements, costing employers tens of thousands of unrecoverable dollars with each injury. Prevent injuries, keep your fleet’s feet on the ground.

**TYPICAL AWKWARD
CONDITIONS IN THE WORK
VEHICLE ENVIRONMENT**

**DECKED SUPPORTS
OPTIMAL ERGONOMIC
WORKING CONDITIONS**

WEATHERPROOF

DESIGNED TO BE OUTSIDE IN THE ELEMENTS.

DECKED is designed and engineered to live outside in the elements. Built from High Density Polyethylene (HDPE), cast aluminum and stainless steel, your tools, hardware and other drawer contents are kept protected and dry. Our product is unaffected by extreme shifts in temperature, blazing UV exposure or anything else the environment may bring.

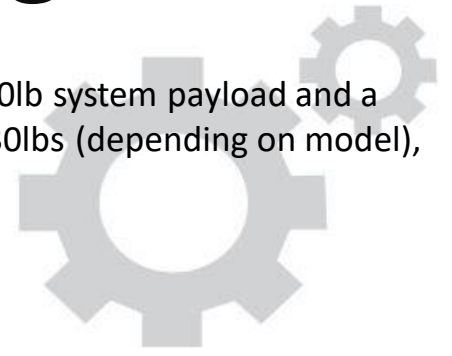

SECURE PIECE OF MIND.

Unlike other toolboxes, DECKED is out of sight and out of mind, providing peace of mind when it comes to guarding your valuables and key items. With the tailgate closed and locked, drawers are inaccessible and unable to be opened. Combined with our drawer locks, your tools and other essentials are safe and secure.

HEAVY DUTY ENGINEERING

UNMATCHED STRENGTH-TO-WEIGHT.

Using CAD data and OEM engineering standards, DECKED delivers a 2000lb system payload and a 200lb load rating per drawer. With a total product weight of only 205-230lbs (depending on model), DECKED has a strength-to-weight ratio of ten to one.

UNDERSIDE VIEW

Depending on your bed length, each system will have 6-7 galvanized steel tubes running laterally through the deck. Dimples in the deck surface identify steel tubes for easy location when attaching components.

HIGH DENSITY POLYETHYLENE (HDPE)

Impervious to the elements and unaffected by solvents, lubricants and other compounds, HDPE is the ideal material with its ultra resilient and durable properties.

FULL USE OF YOUR BED

Hey tough guy, no sacrifices, no B.S. Decked has a true 2,000 lb payload and preserves the entire footprint of your bed. So load up and get busy workin'.

ORGANIZED STORAGE

End the junk show. Easily access your tools and gear. DECKED Drawers get you dialed in and makes your life more efficient.

SECURE

Close 'er up, and your beloved tools, 12 ga, and other job supplies are secure and out of sight. Drawer & Bin locks are also available. Combine that with you tailgate and you have total piece of mind.

SYSTEMS FOR FULL & MID SIZE TRUCKS

**THE ALL NEW DECKED 2.0 DRAWERS ARE LOADED W/
IMPROVEMENTS FOR BOTH FULL & MID SIZE TRUCKS**

*8' LONG BED SYSTEMS DO NOT COVER ENTIRE BED FLOOR

Full bed-length drawers and side access pass-throughs to the wheel wells offer massive, customizable storage. Almost zero wasted space. Exactly 100% increase in the utility of your truck bed. Full-size standard drawers extend 12" further and Full-size short drawers extend 1" further. Midsize standard drawers extend 7" further and Midsize short drawers extend 3" further

DECKED

REDESIGNED FROM THE GROUND UP.

Two completely new Drawer Systems redesigned and vastly improved. Informed by over 250,000 customers, 15,000 reviews, and thousands of installs... We made the best even better.

NEW FULL-SIZE SYSTEM FEATURES:

- Increased Drawer Extension! The #1 request...The drawers now pull out farther.

- New Drawer profile... Bigger, roomier, More usable, with 10% more volume per drawer.

- Ditched the ammo cans for Pass Throughs. Now there's unrestricted access from the tailgate to the wheel well. No more wasted space. Included Stash Bin option is now waterproof and lockable.

- Improved design increases dust and water resistance. New close-out panels prevent particulate intrusion of all kinds. Squared off drawer face provided additional protection from dust and water.

NEW MID-SIZE SYSTEM FEATURES:

- One ultra-wide drawer for maximized usable storage area. Almost NO wasted space. One drawer to rule them all.

- Increased drawer extension means easier access and unrestricted storage. A 30% increase in storage volume!

- A tongue and groove aluminum tray holds 400lbs of your stuff with ease and is incredibly light.

- Completely re-engineered support structure ditches the ammo cans for Pass Throughs, giving you access in front of, and behind wheel wells. Carry it all, reach it all.
